EXHIBIT HALL BOOTH DIRECTORY

AFTERMATH SERVICES, LLC | BOOTH #16

<http://aftermath.com>

<https://www.linkedin.com/company/aftermath-services/>

With over 29 years of industry-leading experience, Aftermath Services® is the only trauma and hazard remediation company consistently elevating standards of care and professionalism. Spanning over 100+ nationwide offices and mobile units, and offering 24-hour emergency response, meaning we are always there when you need us.

AMPED SOFTWARE USA, INC. | BOOTH #15

www.ampedsoftware.com

Amped Software sets the standard for image and video forensics. Our software solutions are used by the top law enforcement, military, and government agencies worldwide. The company focuses on developing global leading solutions for all image and video processing needs relating to forensics, investigations, public safety, and intelligence. With an emphasis on the transparency of the methodologies used, Amped solutions empower customers with the three main principles of the scientific method: accuracy, repeatability, and reproducibility.

BERLA | BOOTH #10

<http://www.berla.co>

Berla Corporation creates solutions for investigators to identify, acquire, and analyze critical information stored within vehicle systems. The average vehicle generates over a terabyte of data each day. Their systems are constantly collecting and generating information about when a vehicle is used, how it is performing, and the environment around it. As the technology in modern day vehicles continues to grow, so will evidentiary opportunities. Berla's collection of tools form the iVe Ecosystem, which supports investigators throughout the entire vehicle forensics process. There is a mobile app for identifying vehicles, performing automotive network acquisitions, and viewing collections, a hardware kit for acquiring vehicle systems, and a robust forensic software for analyzing data to uncover what happened, where it occurred and who was involved.

BODE TECHNOLOGY | BOOTH #22

www.bodetech.com

<http://www.linkedin.com/company/bode-technology>

For over 30 years, Bode Technology has been leading the forensic industry in innovation and timely resolution within the criminal justice system. Bode offers state-of-the-art forensic DNA technology along with an array of industry leading DNA collection products that serve law enforcement and identification communities worldwide.

In addition, leveraging the strength of both our research and development and validation scientists, Bode also provides forensic consulting, training, and laboratory validations, including ISO-certified proficiency testing.

This comprehensive solutions menu, combined with our recognized commitment to quality, responsiveness, and transparency, has made Bode the industry leader in the private forensic DNA community.

CELLEBRITE | BOOTH #2

<http://www.cellebrite.com/>

Cellebrite is a leading digital forensics company that develops software and hardware tools for law enforcement, military, and enterprise organizations. Its solutions allow investigators to securely bypass security locks and lawfully extract, analyze, and manage digital evidence from mobile devices, computers, and cloud services.

CLOSURE | BOOTH #25

<http://www.closure-intel.com/>

<http://www.linkedin.com/company/closure-intel>

The first Digital Analyst for law enforcement. Closure combats evidence overload. Securely transcribe, translate, search, organize, and analyze your case evidence — so your agency can focus on its mission.

COMPASS IGG & ADVOCACY | BOOTH #17

<http://www.closure-intel.com/>

<http://www.linkedin.com/company/closure-intel>

Compass IGG & Advocacy resolves cases of unidentified missing persons through investigative genetic genealogy (IGG) and advocacy for families of the long-term missing. As a non-profit organization, Compass provides all services to our partners in law enforcement and families at no cost. By partnering directly with law enforcement, medical examiners, and coroners nationwide, Compass provides expert DNA analysis and research strategies to break through investigative dead ends. Simultaneously, their dedicated advocacy team supports the families of the long-term missing with outreach and direct-to-consumer DNA testing, in effect working cases from both ends to ensure justice.

CYBERGENETICS | BOOTH #19

<https://cybgen.com/>

For over 25 years, Cybergenetics has innovated powerful software that resolves complex DNA data. The company pioneered accurate DNA mixture analysis. TrueAllele® – their fully automated probabilistic genotyping technology – routinely solves “impossible” DNA mixtures. TrueAllele transforms uninterpretable forensic DNA evidence into useful identification information. The advanced science has helped prosecutors and defenders in tens of thousands of criminal cases. Cybergenetics analysts solve DNA problems, testify in court, and help exonerate the innocent.

DNA LABS INTERNATIONAL | BOOTH #20

<https://dnalabsinternational.com/>

<https://www.linkedin.com/company/dna-labs-international>

DNA Labs International is a private, woman and family-owned forensic DNA laboratory using innovative technologies to help solve crime faster. Since 2004, we've partnered with the forensic community to provide quality results and friendly service while improving casework outcomes. Our powerful DNA Toolbox combined with our skillful team of technical experts gives each case the best chance of success, with collaborative support, accredited methods, and an unwavering dedication to justice.

EXHIBIT HALL BOOTH DIRECTORY

DNA SOLUTIONS | BOOTH #24

<https://www.dnasolutionsusa.com/>

<https://www.linkedin.com/company/9303994>

DNA Solutions is a full-service laboratory that provides genetic testing services to human identification and forensic markets. Our experienced team utilizes the most advanced scientific tools to deliver superior, cost-effective solutions for our clients. DNA Solutions is ANAB ISO 17025:2017 accredited for forensic testing (FT-0302), FBI QAS accredited, and AABB relationship testing accredited. Competitive pricing, rapid turnaround time, and first-rate customer service are just a few ways we help you solve challenging DNA forensic casework.

DOTPRODUCT LLC | BOOTH #12

<https://www.dot3d.app/csi>

<https://www.linkedin.com/company/dotproduct/>

DotProduct LLC develops and markets Dot3D, the app being used by police agencies of all sizes around the world to easily, accurately and inexpensively capture and 3D document crime and crash scenes from mobile phones and tablets.

EVIDENT FORENSIC SUPPLY | BOOTH #27

<https://www.shopevident.com/>

Evident Forensic Supply is the premier US supplier of everything crime scene - from evidence tape to fingerprint brushes to evidence bags. We also have full kits that enable your crime scene folks to have it all in one place - ready to go. Evident is also the exclusive supplier of the M-Vac forensic DNA collection system and the new, hand-help ALS system called the Mo-Sho!

FBI VIOLENT CRIMINAL APPREHENSION PROGRAM (VICAP) | BOOTH #7

<https://www.fbi.gov/how-we-investigate/behavioral-analysis>

The Violent Criminal Apprehension Program (ViCAP) is the FBI's national repository and analytical program for violent crimes. ViCAP collects, analyzes, and shares information on homicides, sexual assaults, missing persons, unidentified human remains, and other violent offenses to identify patterns and link crimes that may have been committed by the same offender. By connecting investigators across jurisdictions and providing analytical support, ViCAP helps law enforcement solve serial violent crimes, identify unknown offenders and victims, and prevent future victimization.

KELSEY SMITH FOUNDATION, INC. | BOOTH #5

<https://www.kelseysarmy.org/>

<https://www.linkedin.com/company/kelseysarmy/>

<https://www.facebook.com/KelseysArmy>

To honor and perpetuate the life of Kelsey Smith by empowering families, friends, and communities to proactively protect one of its most precious resources, namely its youth and young adults; to develop, implement, and provide targeted prevention education, instruction and resources, including shared information and techniques, focused on safeguarding youth and young adults; to recommend and provide advocacy programs and resources should a youth or young adult be missing or abducted; and to develop and assist in the development of programs and projects that have both state-wide and national applicability and impact.

LEXISNEXIS RISK SOLUTIONS | BOOTH #14

<https://risk.lexisnexis.com/le>

<https://risk.lexisnexis.com/products/accurint-one>

LexisNexis® Risk Solutions Criminal Investigative & Analysis solution capabilities, including our Accurint® product suite, leverage massive data and advanced analytics to help law enforcement solve crimes. They also facilitate cross-jurisdictional collaboration with powerful information sharing and data fusion tools, in support of specific law enforcement and homeland security missions.

LUMYX | BOOTH #4

<https://lumyx.com/>

<https://www.linkedin.com/company/lumyx/>

Lumyx turns your complex digital evidence into a stunning case presentation — a.k.a. the “crimeline”. Agencies use it for investigations, storyboarding, and presenting to DAs. DAs use it for plea deals and trials.

The case intelligence platform that connects the dots and brings clarity to every case.

MAGNET FORENSICS | BOOTH #26

<https://www.magnetforensics.com>

<https://www.linkedin.com/company/magnet-forensics>

Magnet Forensics helps agencies better protect individuals and the communities they live in by giving investigative teams an advantage with stronger digital evidence. Magnet Forensics provides an investigative edge through AI-ready digital investigation solutions that acquire, analyze, report on, and manage evidence from digital sources, including mobile devices, computers, IoT devices and cloud services.

A go-to partner for more than 6,000 public and private sector customers in over 100 countries, Magnet Forensics solutions are created by investigators for investigators as they move forward in a shared mission: to unlock the truth and protect the innocent.

MOXXY FORENSIC INVESTIGATIONS | BOOTH #8

<http://moxyforensics.com/>

<https://www.linkedin.com/company/moxy-forensic-investigations/>

<https://www.facebook.com/moxyforensicinvestigations>

The mission of Moxxy Forensic Investigations is to provide exceptional Investigative Genetic Genealogy (IGG) services to investigating agencies, exhibiting respect and diligence for the victims and their loved ones, working with determination and integrity to assist agencies in identifying unknown individuals, and upholding the confidentiality of sensitive case information. We are victim-centered. We hold integrity and ethics in the highest regard. We are committed to our partnerships and amplifying the stories of those who are known and unknown.

For us, this is an opportunity to best represent the loved ones of those who have had their lives tragically cut short. We know that these people, their loved ones, and the community they are a part of matters most, and we are committed in helping to bring closure to the countless cases of unidentified human remains and unsolved violent crimes.

EXHIBIT HALL BOOTH DIRECTORY

THE NATIONAL MISSING AND UNIDENTIFIED PERSONS SYSTEM (NAMUS) | BOOTH #3

<https://namus.nij.ojp.gov/>

The National Missing and Unidentified Persons System (NamUs) is a national centralized repository and resource center for missing, unidentified, and unclaimed person cases across the United States. NamUs helps investigators match long-term missing persons with unidentified remains to resolve cases and bring resolution to families.

OTHRAM | BOOTH #6

<https://othram.com/>

Othram empowers the justice system to deliver better answers for victims and their families through the innovation, development and deployment of advanced technology solutions.

Othram's ISO/IEC 17025:2017 accreditation scope includes pairwise comparison of forensic SNP profiles, as performed within Othram's KinSNP® service for law enforcement and crime laboratories.

Othram's technology combines laboratory science, software, and process, to build a better and more robust infrastructure for justice. More forensic cases have been solved using FGGS® than with any other sequencing method, demonstrating its effectiveness and reliability in real-world casework.

PEACE RIVER K9 SEARCH & RESCUE | BOOTH #1

<http://prsar.org>

<https://www.facebook.com/prsark9>

Peace River K9 Search and Rescue is governed by an all volunteer Board of Directors and registered as a Florida Non Profit Corporation with a Federal tax exemption status of 501(c)(3) IRS 27-1584186 FL State Charity CH 31988.

Our mission is to assist local, state, military, federal, private agencies and families as a force multiplier in the recovery of lost, missing and abducted persons in urban, wilderness, natural and man-made disasters while proactively educating response agencies and the community on volunteer Search & Rescue. Peace River K9 Search & Rescue strives to be a leader and preferred service provider to Law Enforcement, Emergency Management and its community.

PRSAR never charges for their services, however they are ready to respond 24 hours a day—everyday, with a High level of Professionalism and Performance "So that Others may Live".

PRECISION SURVEY SUPPLY | BOOTH #18

<https://precisionsurveysupply.com/>

A distributor of Leica laser scanners and products for public safety.

SHERRY BLACK FOUNDATION | BOOTH #13

<https://sherryblackfoundation.org/>

<https://www.linkedin.com/company/sherry-black-foundation>

Sherry Black Foundation supports investigators by removing barriers, consulting on cases, and providing advanced training to help solve cases. We are here to provide support where you need it and bring advanced training local.

TRIMBLE, INC. | BOOTH #9

<https://geospatial.trimble.com/en/industries/public-safety-and-forensics>

<https://www.linkedin.com/company/81937701>

<https://www.facebook.com/TrimbleForensicsMedia>

Established in 1978, Trimble Inc. is a global technology leader that aims to bridge the physical and digital worlds. Trimble Forensics is a specialized division of Trimble, focused solely on providing high-precision data collection, analysis, and presentation for law enforcement, crash reconstructionists, and crime scene investigators. These solutions ensure that evidence collected and analyzed is accurate and court defensible from scene to courtroom.

QIAGEN HID & FORENSICS | BOOTH #21

<https://www.qiagen.com/us/applications/human-identity-and-forensics>

<https://www.linkedin.com/company/qiagen-hid/>

QIAGEN has a leading position in the human identification and forensics market, having pioneered the introduction of commercial DNA purification kits for forensic casework samples in the late 1990s. Its comprehensive range of solutions, including sample collection and preparation kits, DNA profiling tools, and workflow automation products, are trusted by forensic science laboratories and investigators worldwide. In early 2023, QIAGEN acquired Verogen, a leader in the use of NGS technologies to further drive the future of human identification and forensic investigation. Both companies had previously been commercialization partners through a distribution agreement. This acquisition has enabled QIAGEN to offer the most complete workflow in the human identification and forensics market, solidifying its leading position.

VERIPIC | BOOTH #11

<https://www.veripic.com/>

<https://www.linkedin.com/company/veripic>

VeriPic delivers a complete suite of solutions built specifically for law enforcement and public safety professionals. From collecting evidence in the field to citizen-submitted uploads, organized storage, redaction, and courtroom preparation—our tools work together to give your agency total control over digital evidence.

VERITONE | BOOTH #23

<https://www.veritone.com/>

<https://www.linkedin.com/company/veritone-inc/>

Veritone (NASDAQ: VERI) designs human-centered AI solutions. Since 2014, the people at Veritone have focused on building enterprise AI solutions and applications that solve problems for its customers in the public sector. Veritone's blend of expertise and technology helps organizations spend less time on repetitive tasks so they can focus on what matters – protecting and serving their communities. Veritone Public Sector enables teams in law enforcement, government, and public safety to streamline manual identification and redaction efforts, and accelerate audio and video processing with intelligent automation.

Veritone is proud to enable public servants at all levels to turn data into action that helps keep people safe and improves life for everyone in the community.
